V.01015.1

A HISTORY BASED ON INNOVATION AND SUCCESS

In 1884, Karl Elsener started his cutlery factory and soon became the official supplier of the Swiss Army, with the now famous Soldier's Knife. He then went on to invent the Officer's and Sport Knives, which were officially registered in 1897.

In 1909, Karl Elsener named his company Victoria in memory of his mother.

When stainless steel (Inox) was invented in 1921, the family company became Victorinox.

The name "Swiss Army" was born from the immense popularity on the Victorinox Swiss Army Knife, which enjoyed was by the American GI's returning to the USA in 1945.

1884

1909

1945

2002

2003

2005

The company Swiss Army Brands, Inc. is privatized under Victorinox's license. The timepiece brand Victorinox Swiss Army is launched internationally.

The Victorinox Swiss Army timepiece collections evolved with mechanical movements, chronographs with collection like ChronoPro and other innovative and easy-to-use functions.

Victorinox Swiss Army introduces the AirBoss, a technical and aviation-inspired timepiece collection. The Night Vision was also launched, it was the first timepiece equipped with three LED systems.

Introduction of the ST-5000, the first timepiece equipped with a digital compass and a pathfinder.

Swiss Army launches the "Original" with great success, followed by which was numerous collections inspired by the spirit and functionality of the original Swiss Army knife. In the US, the brand "Swiss Army", registered by Victorinox, benefits from a notoriety of almost 90%.

A range of Victorinox Travel Gear is launched, manufactured under license.

Victorinox Apparel launches in the USA. The first flagship store opened in Soho, New York City.

1989

1999

2001

The SC (Solar Compass), first limited edition timepiece, equipped with a solar compass.

2006

2007

2008

Victorinox Swiss Army builds its timepiece production facility in Porrentruy, to meet the increasing delivery demand and to ensure the high-quality timepiece.

Watch brand management headquarters are centralized in Switzerland. The Sales, Marketing and Customer Service departments are located in Bienne, the Logistic department is in Ibach.

Victorinox Fragrance is launched.

Nowadays, the company is managed by Carl Elsener Sr, and his son, Carl Elsener Jr. It employs 1700 people, including all worldwide subsidiaries and all product division.

Truly symbolic...

Mother-of-pearl is said to symbolize feminine, protective and maternal virtues. It envelops the soul in a tender, delicate veil and is reputed to have protective qualities for its wearer.

Mother-of-pearl promises safety and well-being, in this instance ensconced within a beautiful yet practical timepiece.

ST-5000 WITH PATHFINDER

Swiss-made movement
 Lightweight titanium case
 Domed shock-resistant hardened mineral crystal
 Luminescent hands and numbers

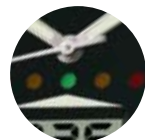

How to use in 3 simple steps:

1. Find True North in the
Compass Mode

2. Lock your heading

3. Keep your course in the
Pathfinder Mode (Where
to Go)

- ○ ● ○ ○ on path (+/- 0-5°)
- ○ ● ● ○ off path (+/- 5-20°)
- ○ ○ ○ ● off path (+/- 20-30°)
- ○ ○ ○ ● off path (+/- 30-90°)

24837 ST-5000 WITH PATHFINDER
 QUARTZ
 Ø 42 mm

World première timepiece

Key information is conveyed in an extremely practical and easy-to-understand format thanks to the use of LEDs (light emitting diodes) in universally recognised colours:

- Green = right direction
- Orange = slight deviation from course
- Red = wrong direction

Module

Swiss-developed and Swiss-made electronic module invented by Victorinox Swiss Army including a very sensitive magnetic sensor.

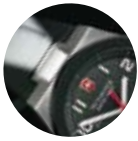

NIGHT VISION II

- Swiss-made movement
- Stainless steel case (316L)
- Water resistant to 50M (5ATM, 165 FT)
- Scratch-resistant triple-coated anti-reflective sapphire crystal
- Luminescent hands and numbers
- Battery end-of-life indicator

Lighting modes

Swiss developed and Swiss-made low consumption light module with 3 different light sources:

White LED flashlight
(continuous light, signal and strobe functions)

Blue LED for dial illumination

Red LED for locator and battery end-of-life indicator
(lighting system)

OUR THREE CORE VALUES

FUNCTIONALITY

Each timepiece is thought through, in every detail, to make it useful and timeless. Functionality can be expressed from simple clear legibility to sophisticated functions.

INNOVATION

Victorinox Swiss Army is always seeking to equip its timepieces with innovative and practical functions, finding creative ways of using existing components to enhance capabilities.

RELIABILITY

The Victorinox Swiss Army timepieces are not only designed and produced in the same quality philosophy as the legendary Pocket Tools, but they also meet the highest standards of the Swiss watchmaking industry. It is the overall quality of each timepiece (material, movement, finishing, etc) that allows Victorinox Swiss Army to provide a 3-year limited warranty.

FUNCTIONALITY

LEGIBILITY

An ideal legibility is simply brought through an ultra-legible countdown function or a contrasted dial allowing easy reading. The Dive Master 500 range shows how it can be put in practice with the oversized date magnifier and the very legible markers.

DATE CORRECTOR

In order to allow the date correction without manipulating the crown, the Valjoux 7750 movement features a special date corrector on the left side of the watchcase. The date setting with a pencil is simple and functional.

INGENUITY

For fall 2008, Victorinox Swiss Army introduces a highly ingenious and legible ETA movement, the 988.333. All functions can be accessed through the crown and the very legible analog time indication is complimented by two LCD displays. And the chronograph capacity is up to 48 hours!

INNOVATION

EXCLUSIVE SECOND HAND INDICATION

Alpnach, named after the Swiss Air Force's helicopter base, the collection is distinguished by the 4-bladed rotor design of the second hand on its mechanical chronograph models.

HIGH QUALITY MOVEMENTS

Exceptional execution of the Airboss Mach 6 equipped with a rare version of the Valjoux 7750, including an additional complication made of a sectorial power reserve indicator. Only 333 pieces of the Airboss Mach 6 Power Gauge Limited Edition are issued worldwide, which feature this special movement.

PVD COATING

This high-performance pollution-free and non-allergenic technology issued from the aeronautic is now currently used in the timepiece industry. Victorinox Swiss Army proposes several models featuring a Black Ice or a black PVD coating, including the Dive Master 500, Airboss Mach 6 Power Gauge Limited Edition and the Chrono Classic XLS MT.

ST-5000 WITH NAVIGATION SYSTEM

Features the exclusive "PathFinder" orientation and navigation function – the first timepiece in the world to feature such a function, operated by a unique thumb-controlled pusher.

Digital compass system that can be used worldwide, indoors and outdoors, and in almost any weather conditions (operational temperature range: from -20° to +70°).

Key information is conveyed in an extremely practical and easy-to-understand format thanks to the use of LEDs (light emitting diodes) in universally recognised colours: green = correct direction, red = wrong direction and orange = slight deviation from course.

NIGHT VISION II WITH A FLASHLIGHT FUNCTION

Exclusive "pocket flashlight" function with five different illumination modes controlled by means of a single multifunction pusher located at 8 o'clock and operated by using the right thumb.

In addition to the basic functions of the Night Vision timepiece – dial illumination, mini flashlight and strobe signal mode – an intense distress signal indicates location when no other means of communication is available. The main LED offers a signal function by means of an improved blinking beacon which will operate for 7 days and 7 nights.

The lighting module on the first model, launched as a world first in 2003, has been entirely redesigned and now offers more lighting features with lower

energy consumption. Energy levels of the lighting function are constantly monitored, and a tiny red LED indicates when the battery requires to be changed. This is also useful for locating the watch in conditions of total darkness.

The movement and the lighting system use different batteries. Even if the lighting system battery is low, the watch will always show the exact time.

RELIABILITY

STRONG MOVEMENTS

Victorinox Swiss Army emphasizes the use of highly reliable and technical timepiece components such as the Valjoux, the Valgranges or the Unitas movements. These well-known and well-appreciated mechanisms equip our most beautiful timepieces.

WATERPROOF

All Victorinox Swiss Army timepieces have to go through heavy testing and several quality controls in its facilities before being distributed. All screwed-in pushers and crowns can guarantee to be water resistant up to 500 meters.

SAPPHIRE CRYSTAL

95% of our timepieces are equipped with a highly scratch-resistant sapphire crystal. All of our crystals have a triple-coated anti-reflective treatment, allowing a more comfortable legibility.

AUTHENTICITY

If it does not have our cross and shield emblem and Victorinox Swiss Army on the dial, it is not an authentic Victorinox Swiss Army timepiece. Ours are the only timepieces authorized by the Swiss government to carry the name Swiss Army.

WARRANTY

All Victorinox Swiss Army timepieces are covered by a 3-year limited warranty.

COLLECTION AND DISPOSAL OF QUARTZ WATCHES AT END-OF-LIFE *

This symbol indicates that this product must not be disposed of in household waste. It must be taken to an approved collection centre. In doing so, you will be contributing to protecting the environment and human health. The recycling of materials helps conserve natural resources.

*Applicable in the Member States of the European Union and in countries with similar legislation in place.

WATER RESISTANCE

Water-resistant to 30 meters (100 feet/3 ATM). Will withstand rain or splashes of water and accidental immersion, but should not be worn while showering, swimming or diving.

Water-tested to 50 meters (165 feet/5 ATM). Suitable for showering or swimming in shallow water. Not for diving.

Water-tested to 100 meters (330 feet/10 ATM). Suitable for swimming or snorkelling.

Water-tested to 300 meters (990 feet/30 ATM). Suitable for swimming, snorkelling or skin diving.

Water-tested to 500 meters (1650 feet/50 ATM). Suitable for swimming, snorkelling or scuba diving.

Have your watch's water-resistance checked by an approved Victorinox Swiss Army service centre when replacing the battery and/or every 18 months.

Meter and bar are not the same thing. Under water, air pressure and water pressure combine: a depth of 10 metres equates to 1 bar water pressure plus 1 bar atmospheric pressure at sea level, and so to a total pressure of 2 bar.

KIMBERLY STATEMENT

The diamonds in the timepiece herein shown have been purchased from legitimate sources not involved in funding conflict and in compliance with United Nations Resolutions. We guarantee that these diamonds are conflict free, based on personal knowledge and/or written guarantees provided by the supplier of these diamonds.
